Coastal Ecology Research Laboratory

Introduction

The following bibliography has been compiled to accompany a visual matrix chart of references addressing the effects of oil exploration on the endangered right whale, Balaena glacialis. The bibliography is exhaustive, thorough and includes primary literature: books, chapters, and journal articles; "gray" literature: technical, progress, and final reports, and unpublished contractual reports; and pertinent articles in popular magazines. This bibliography is the third of three bibliographies prepared to accompany visual matrix charts. The bowhead whale, Balaena mysticetus, was the subject of the first bibliography; the gray whale, Eschrichtius robustus, the subject of the second bibliography.

The holdings of the following libraries were examined in preparation of this bibliography:

NMFS National Marine Mammal Laboratory
NMFS Auke Bay Laboratory
University of Alaska
University of California at Berkeley
University of California at Santa Cruz

Files from the MMS Alaska OCS Office and the NOAA OCSEAP Office at Anchorage were inspected for relevant material. Publications examined in their entirety include:

Reports of the International Whaling Commission
Scientific Reports of the Whales Research Institute
(Japan)
Norwegian Whaling Gazette.

Abstracts, papers and notes from the Biennial Marine Mammal Conferences (I-V) and the Bowhead Whale Conferences (1-111) were also examined. Earlier bibliographies searched include:

Darling 1973 - gray whale bibliography only
Bird 1983 - gray whale bibliography only
Hills and Valentine 1982
Severinghaus 1979
Squire 1964
Gold 1977; 1985
Leatherwood et al. 1983
Richardson et al. 1983a

The following computerized data bases were searched using DIALOG in December, 1984:

Aquatic and Fisheries Science
Biosis
Department of Energy
Dissertation Abstracts

Environline
Government Printing Office
Life Sciences
National Technical Information Service
Oceanic Abstracts
Pollution Abstracts
Zoological Abstracts

Key words used in these searches include: whales, cetaceans, bowhead, gray, right, Balaena mysticetus, Eschrichtius robustus, and Balaena glacialis.

References are cited according to the following format:

Author(s). Date. Title, pp.x-xx. In: Editor's name, cd., Title, Conference title, Date of conference. Place of conference. Report #. Agency that contracted for or sponsored the work, Location of agency, Contract no. Place of publication or location of institute' that did the work: Publisher or agency that did the work.

Only information appropriate for the particular reference is included. (e.g. only conference proceedings include title, place, and date of the conference). Journal articles are cited as follows:

Author. Date. Title. Journal title, vol. no. (issue no. if issues not paginated consecutively): page numbers.

An asterisk (*) indicates citations included in the visual matrix. Each reference in the bibliography is followed by a listing of pertinent geographical area(s), topics covered in article, and key words describing content of the reference.

Geographical areas, topics and key words originally were specified by MMS, Alaska Regional Office. Additional key words and geographical areas were added by the compilers when needed. Geographical areas include:

NPAC- North Pacific, north of 50 degrees. In the gray whale bibliography NPAC refers to the Pacific north of the equator.
GOAK- Gulf of Alaska
BERS- Bering Sea
CHUK- Chukchi Sea
BEAU- Beaufort. Sea- includes Canadian Beaufort
ARCT- Arctic

N/S - Not an area specific- includes references which either do not pertain to a specific geographical area or which pertain to all geographical areas.

Additional geographical areas added to the original listing include: Antarctica, Argentina, California, Canada, China, Europe, Greenland, Gulf of Mexico, Indian Ocean, Japan, Korea, Mediterranean Sea, Mexico, Middle Atlantic, New England, North Atlantic, Okhotsk Sea, Oregon, South Africa, South Atlantic, South Pacific, and Washington.

Key words used in the bibliography are listed under each topic area and are defined in Table 1.

Multiple author references included in the visual matrices are cited as Richardson et al., date, sequential letter. The phrase "et al." may refer to different sets of secondary authors, ie., Richardson et al. 1985b refers to Richardson, W. J., R. A. Davis, C. R. Evans, and P. Norton, whereas Richardson et al. 1985c refers to Richardson, W. J., R. S. Wells and B. Wursig. Multiple author references from the same year were assigned sequential letters in alphabetical order if possible.

References for all three bibliographies are contained in one computerized data base. Thus any one bibliography does not necessarily contain all references by the same author(s) which were assigned sequential letters; ie., only Braham, H. W. 1981e appears in the bowhead bibliography.
