## DISCLAIMER

This report was prepared under contract between the Bureau of Ocean Energy Management (BOEM) and John Milner Associates, Inc. (JMA). This report has been technically reviewed by BOEM and it has been approved for publication. Approval does not signify that the contents necessarily reflect the view and policies of BOEM, nor does mention of trade names or commercial products constitute endorsement or recommendation for use. It is, however, exempt from review and compliance with BOEM editorial standards.

## REPORT AVAILABILITY

This report is available only in compact disc format from the Bureau of Ocean Energy Management, Gulf of Mexico OCS Region, at a charge of \$15.00, by referencing OCS Study BOEM 2012-007. The report may be downloaded from the BOEM website through the Environmental Studies Program Information System (ESPIS). You will be able to obtain this report also from the National Technical Information Service in the near future. Here are the addresses. You may also inspect copies at selected Federal Depository Libraries.

**Sample Inquiry to Municipalities**

18 August 2009

Assateague Island National Seashore  
7206 National Seashore Lane  
Berlin, MD 21811

Hello,

The U.S. Department of the Interior, Mineral Management Service (MMS), is conducting a survey of National Register-listed and -eligible properties that may be visually impacted by the future placement of wind turbines within the off-shore Exclusive Economic Zone along the east coast of the United States. This work is being conducted by John Milner Associates, Inc., West Chester, Pennsylvania as a consultant to the MMS. We are soliciting the assistance of local governments in collecting data for this survey.

Our research at the State Historic Preservation Office indicates that the archeological and historic architectural resources listed in the attached document have been identified for your municipality within one-quarter mile inland of the shoreline. If you are aware of other resources located within one-quarter mile inland of the shoreline that may meet National Register eligibility requirements, we would be interested in learning about them. Please provide descriptions and map locations for such resources by return mail within 30 days. Thank you for your attention to this matter. We appreciate your assistance to ensure that all National Register-listed and -eligible properties within one-quarter mile inland of the shoreline are included in our survey.

Montague, NJ 07827

Dear Mr. Holloway:

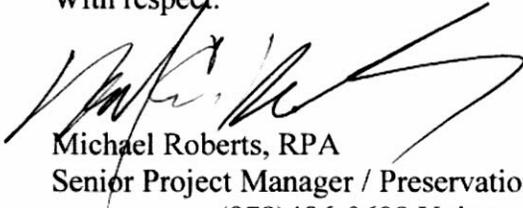

I am writing to request your assistance with a study being undertaken by John Milner Associates, Inc. (JMA) on behalf of the Minerals Management Service (MMS) of United States Department of the Interior. MMS is the agency charged with the responsibility of considering the effects of its actions on significant cultural resources on the Outer Continental Shelf of the United States, from State waters (generally starting three miles offshore) to the limit of the Exclusive Economic Zone (generally 200 nautical miles from shore). JMA has been retained by MMS to prepare a data base of historic properties (including properties of cultural and historic significance to Native American groups) that could be affected by Alternative Energy development projects within this zone. Of special concern is how offshore wind energy projects could visually impact historic properties located on and near the shore. The scope of this study is the entire east coast of the United States. It is not directly associated with any proposed alternative energy project, or any undertaking under Section 106 of the National Historic Preservation Act. Its purpose is to provide a source of baseline information to MMS for use in their evaluation of future projects.

We are aware that there may be ceremonies or other activities conducted by Native Americans as individuals, families, bands or tribes which could be affected by activities under the jurisdiction of MMS. We recognize that the locations where these ceremonies/activities are conducted may include mountain or hill tops a considerable distance from the shore. In order to insure that possible visual or other impacts to these locations are considered by MMS at the earliest stages of their review of proposed projects, and to insure that project developers are also made aware early in their planning of the need to address the issue of visual impacts to these properties, we are asking you to identify, if this can be done without compromising any need for confidentiality, locations from which views of ocean at any time of day hold special significance.

If you believe they would be of assistance we will be glad to provide, if requested, USGS scale maps for your use. If you have any questions or require additional information about this study please contact me by e-mail at [mroberts@johnmilnerassociates.com](mailto:mroberts@johnmilnerassociates.com) or at the address below. We encourage you to respond to this request as soon as possible so that your concerns can be noted in our findings.

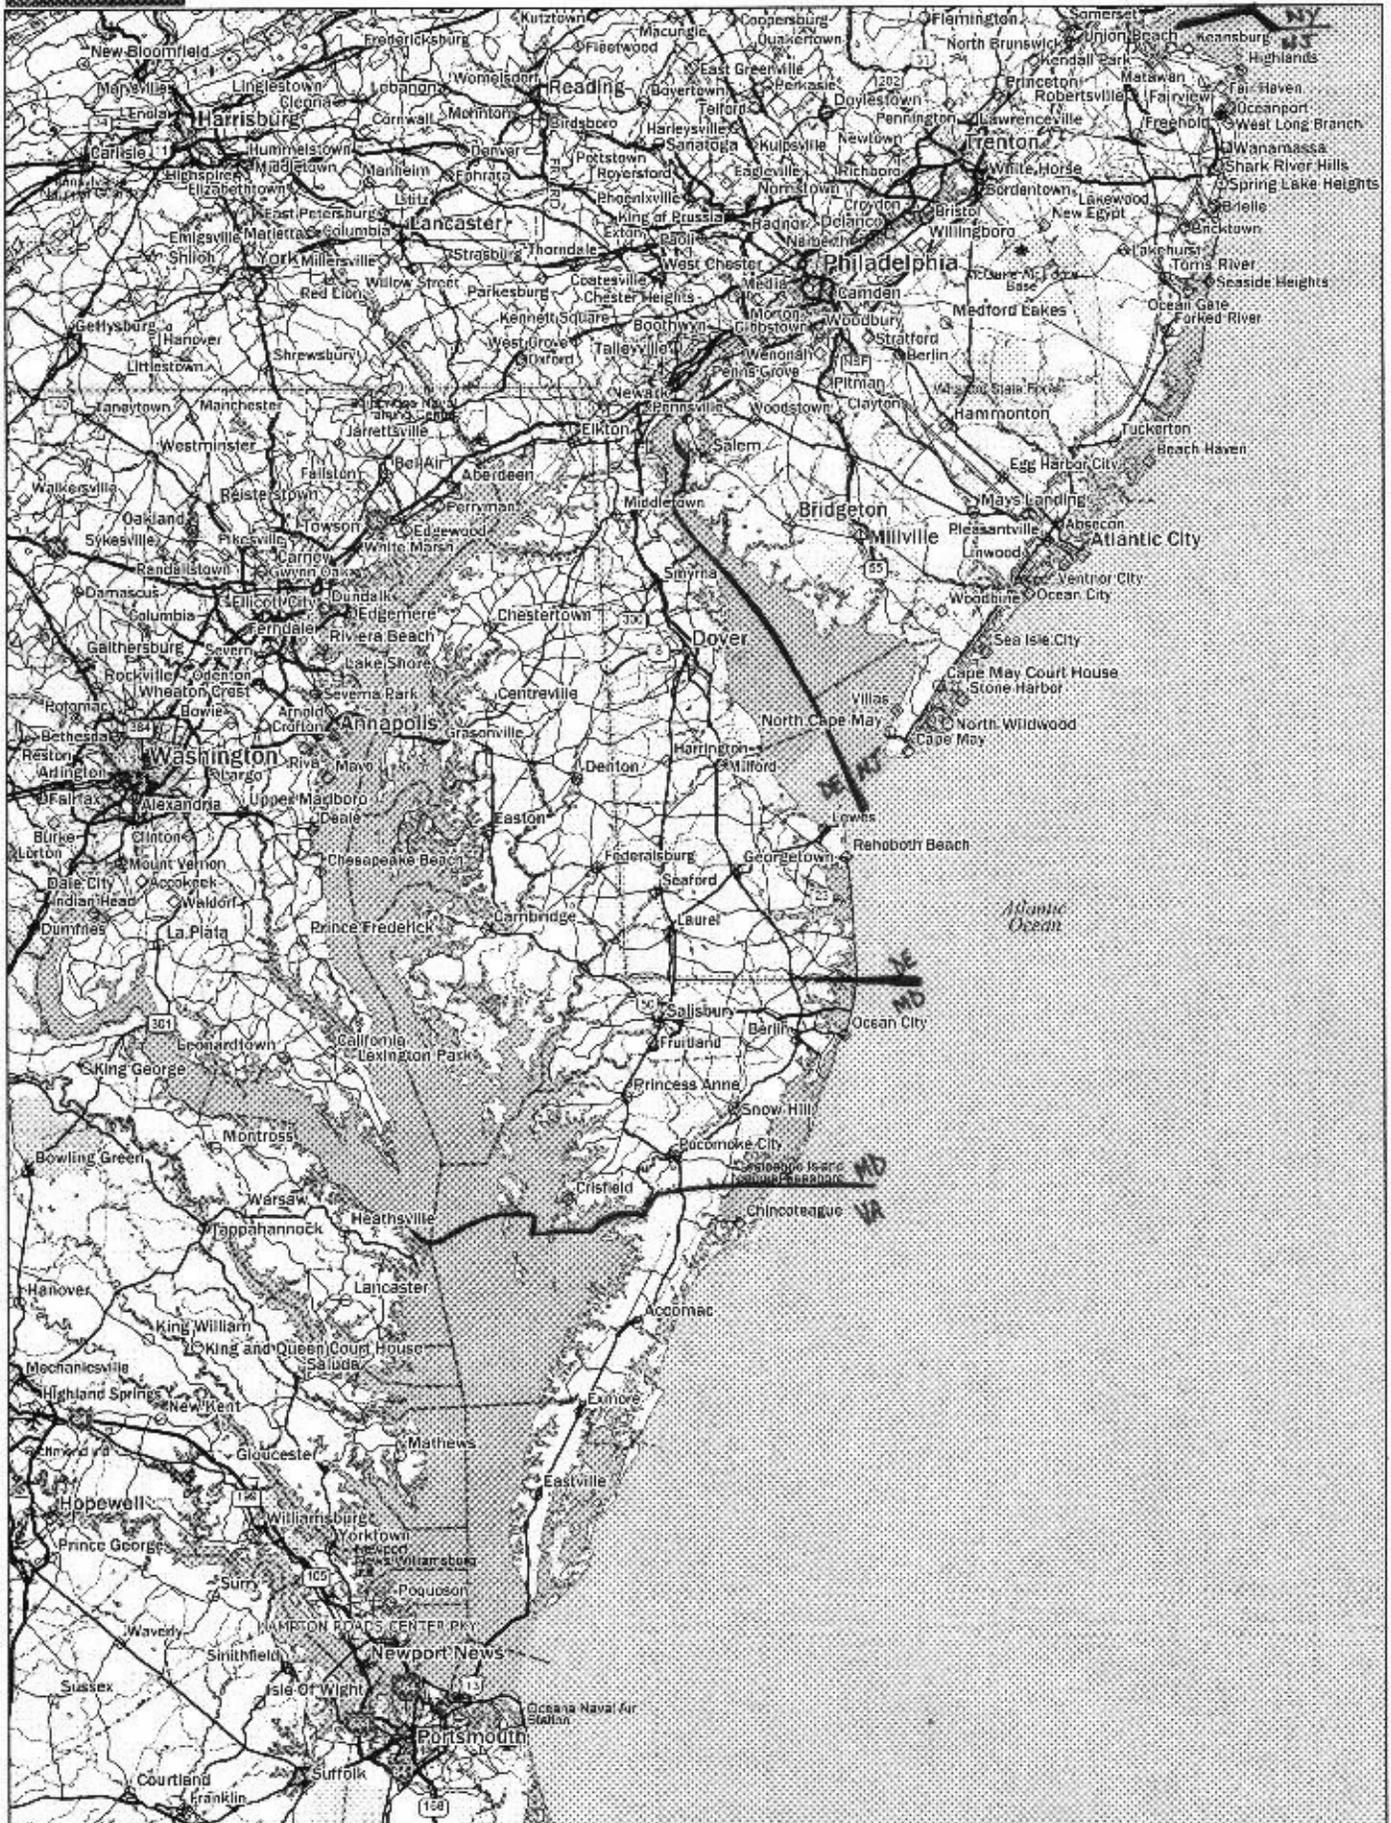

Thank you for your help with this important matter.

With respect.

Michael Roberts, RPA

Mr. Roberts: My Name is Ronald Holloway and I am the Chairman of the Sand Hill Indians. Dr. Beeler had to resign his position for health reasons last year and our new Principal Chief is Medicine Crow. On behalf of our tribe we would like to participate in your program through the MMS in conjunction of section 106 of the National Historic Preservation Act on the outer continental shelf of the U.S. and state waters.

Please feel free to contact either Chief Crow or myself at the following address or return via this email address.

N.J. Sand Hill Band of Indians P.O. Box 1012 Montague N.J. 07827

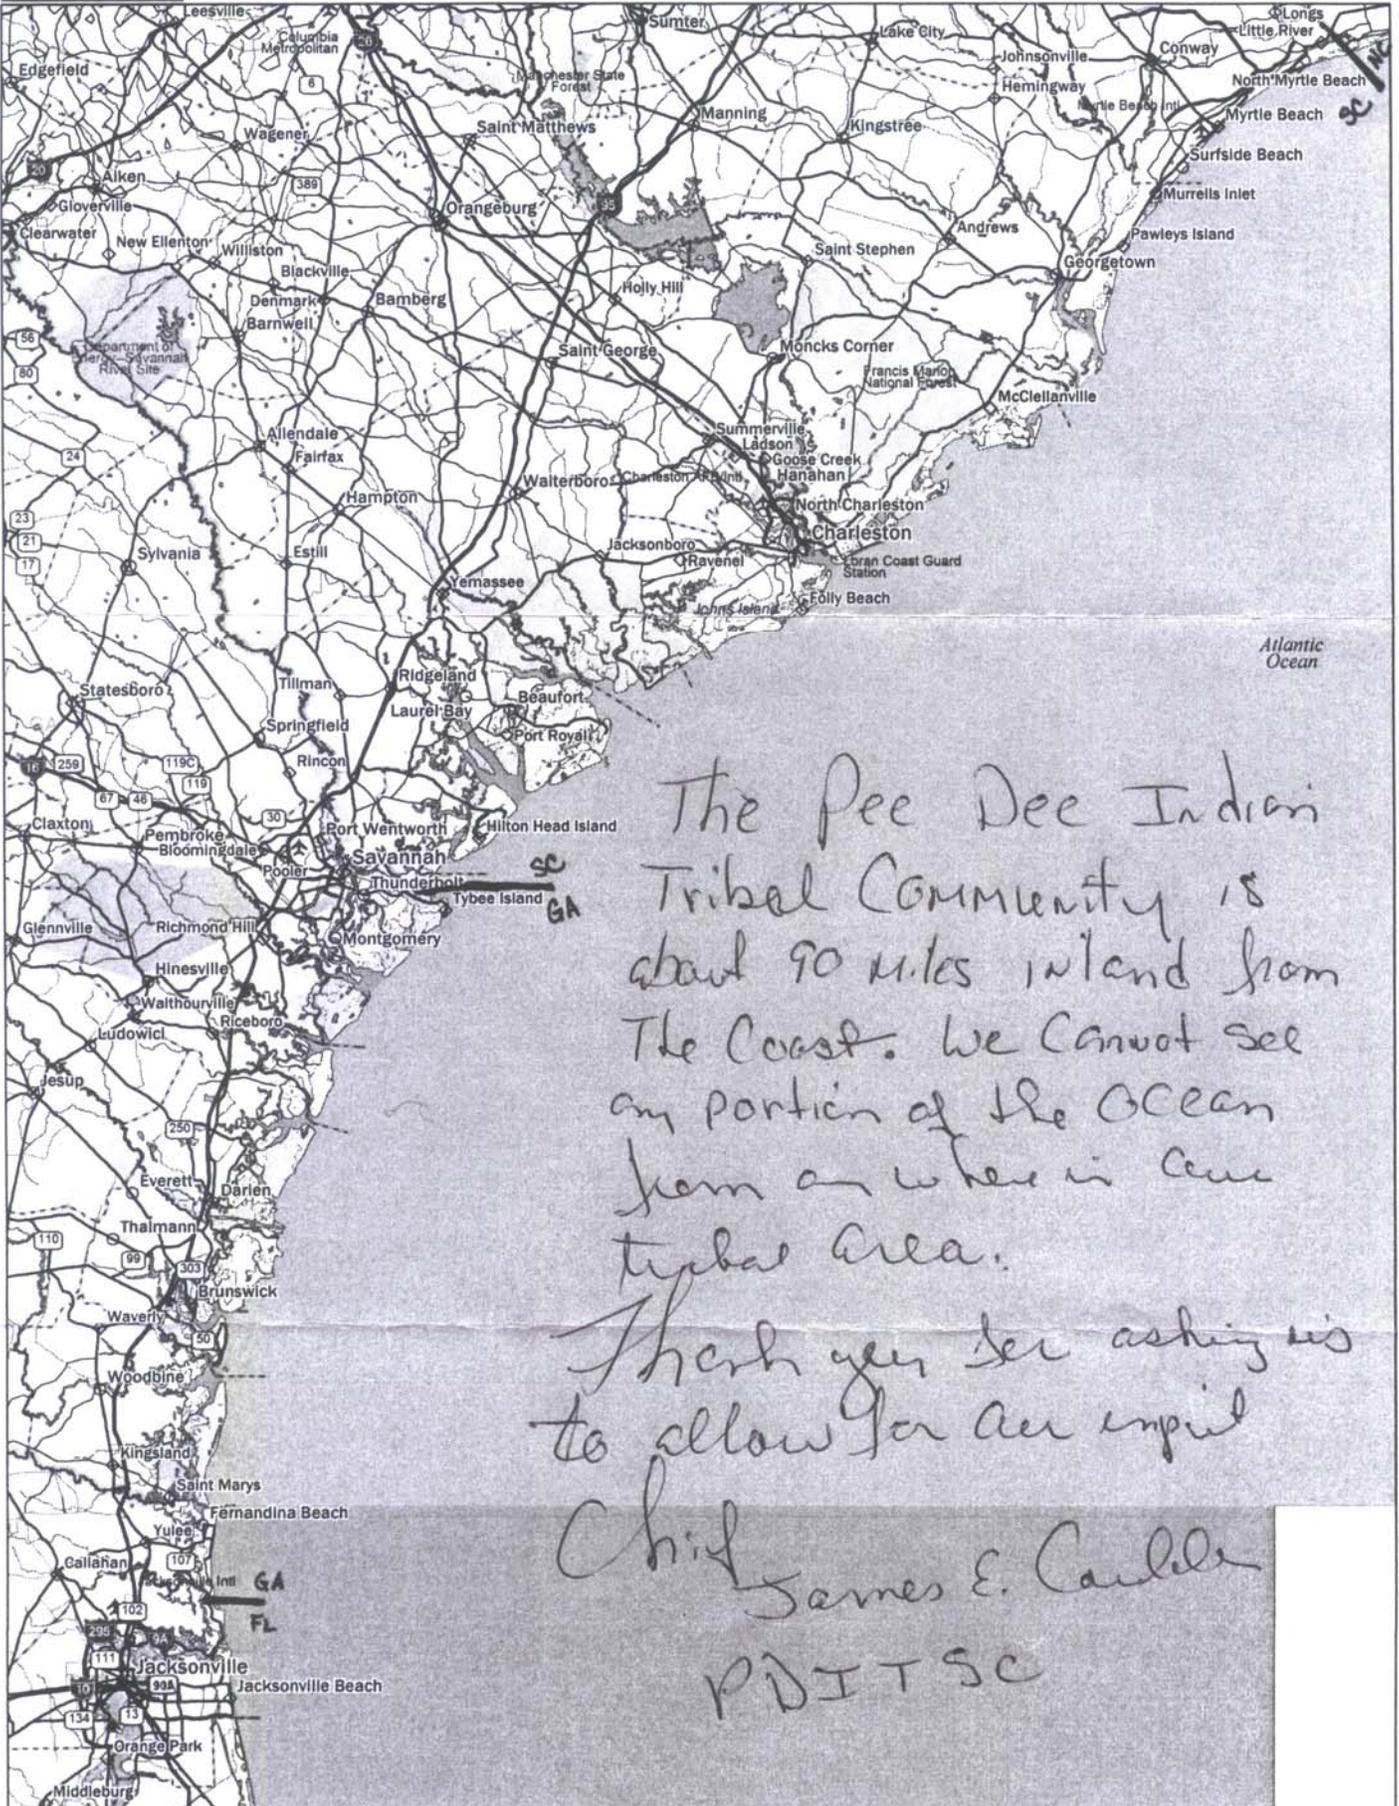

Ronald Yonaguska Holloway, Chairman

Tele.

# 973-293-3884 973-293-3884.

Again thanks for including us in this important project.

Ron

The Pee Dee Indian  
 Tribal Community is  
 about 90 miles inland from  
 The Coast. We cannot see  
 any portion of the Ocean  
 from an where is our  
 tribal area.

Thank you for asking us  
 to allow for an unpaid  
 Chief  
 James E. Caudle

Michael Roberts, RPA  
Senior Project Manager  
410 Great Road, Suite B-14  
Littleton, MA 01460

Dear Mr. Roberts:

This is in response to your letter dated December 8, 2009. We have reviewed and discussed the proposed Alternative Energy projects. The current proposed projects would not have any adverse visual impact on our cultural and historic properties or tribal activities.

Please continue to keep us informed.

Sincerely,

**RE: Minerals Management Services Offshore Project**

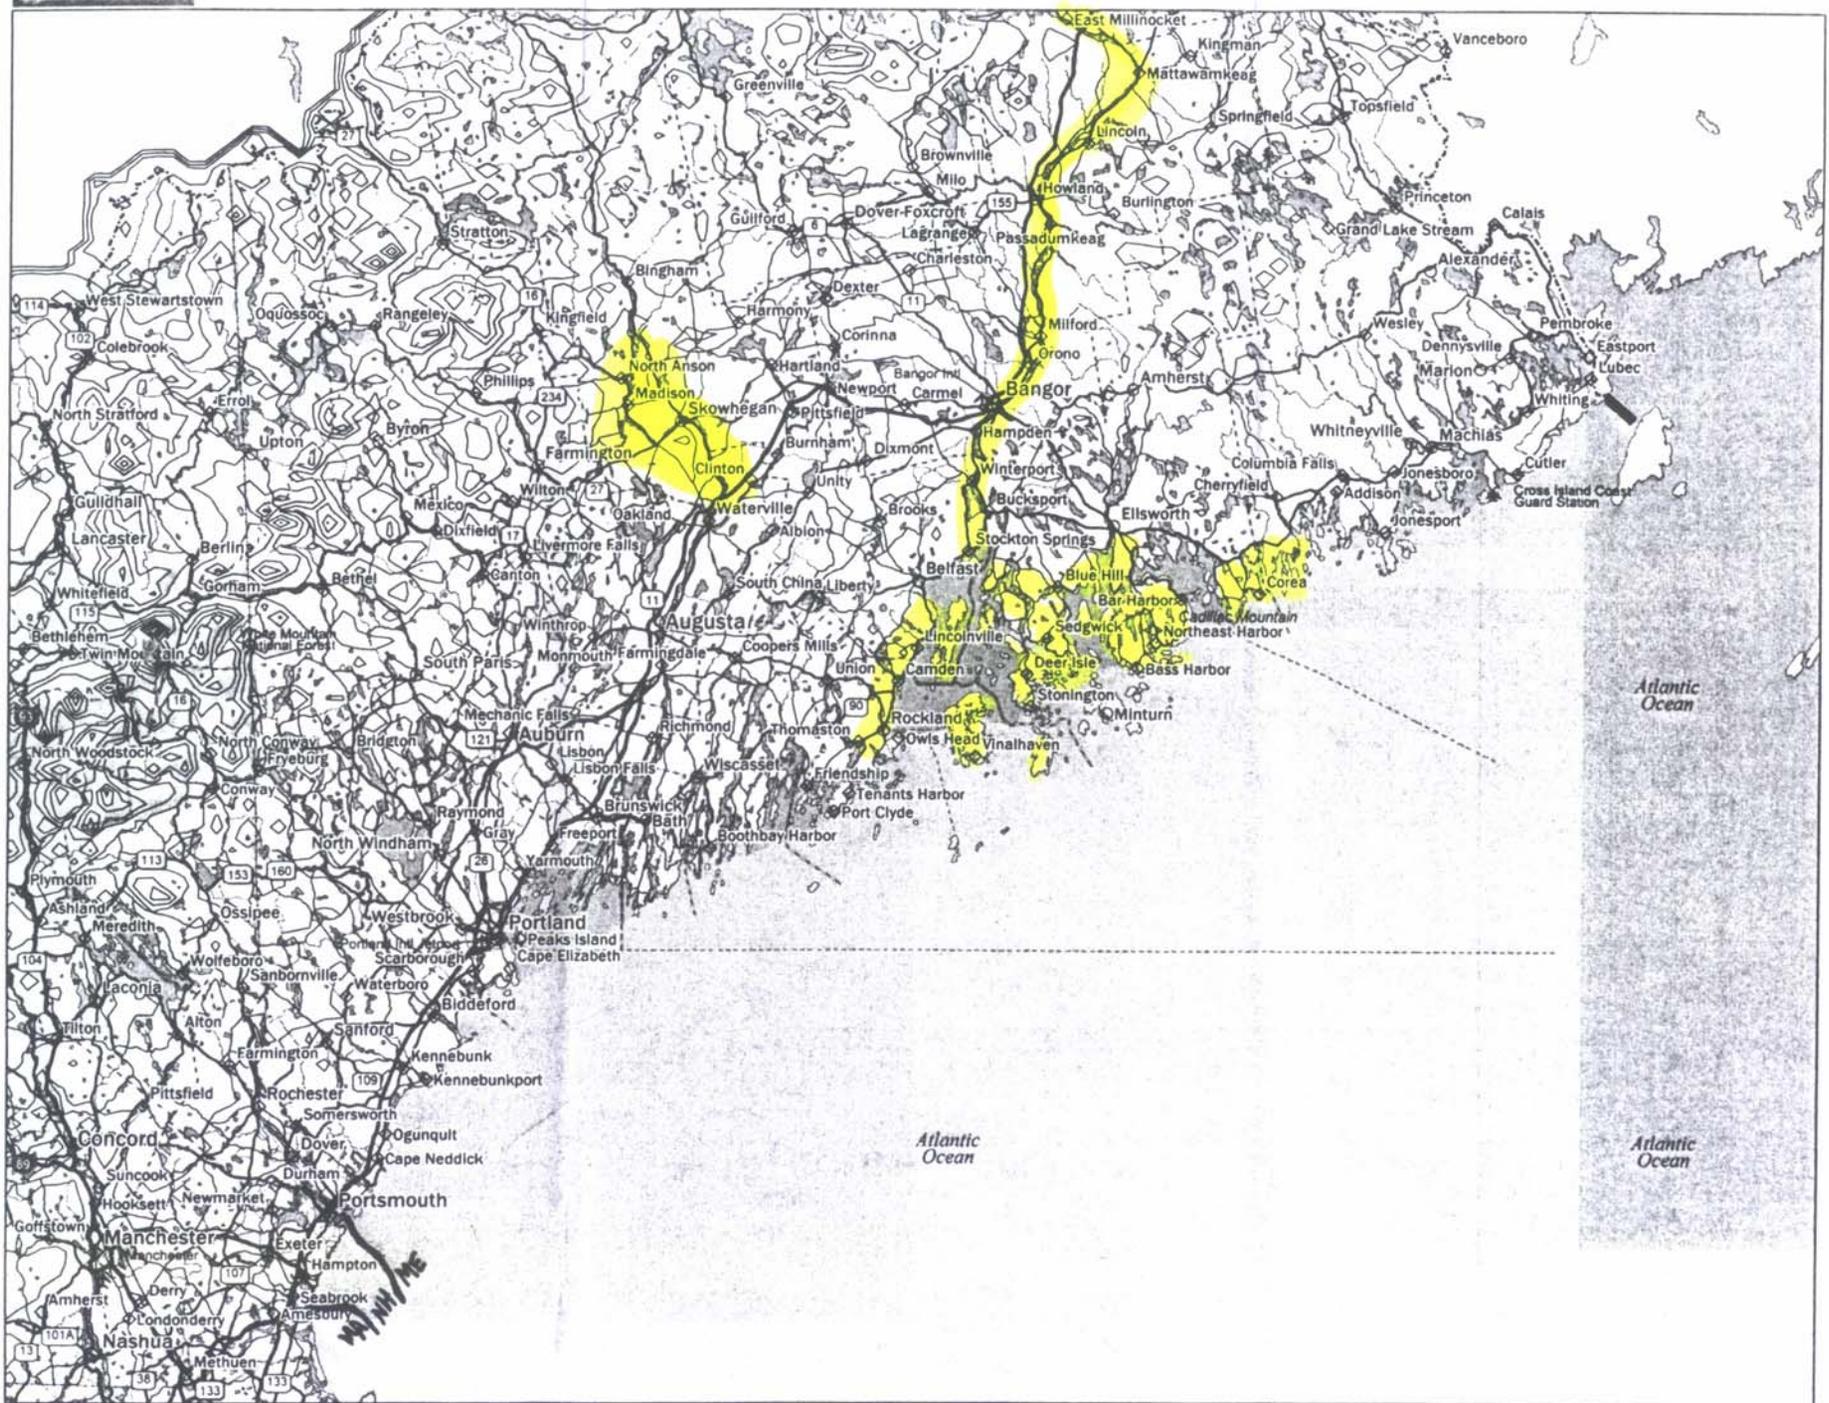

Dear Mr. Roberts:

Thank you for contacting the Penobscot Nation on the above-referenced project. I've attached a map illustrating general areas of high cultural sensitivity to the Penobscot Nation. These areas are either current or past locations of ceremonial or cultural activities.

I hope this information helps in your project planning. Should you have any questions, please contact me at (207) 817-7332.

Sincerely,

Bonnie Newsom  
Tribal Historic Preservation Officer.

## **The Department of the Interior Mission**

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the sound use of our land and water resources, protecting our fish, wildlife and biological diversity; preserving the environmental and cultural values of our national parks and historical places; and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to ensure that their development is in the best interests of all our people by encouraging stewardship and citizen participation in their care. The Department also has a major responsibility for American Indian reservation communities and for people who live in island communities.

## **The Bureau of Ocean Energy Management**

The Bureau of Ocean Energy Management (BOEM) works to manage the exploration and development of the nation's offshore resources in a way that appropriately balances economic development, energy independence, and environmental protection through oil and gas leases, renewable energy development and environmental reviews and studies.
